

# **Cisco 800 Series Integrated Services Routers**

## **Primary Services**

The award-winning Cisco 800 Series Integrated Services Routers deliver the following integrated services at broadband speeds to small offices and teleworkers, or to service providers to deploy as part of their managed network services:

- Data
- [Security](#)
- [Wireless](#)

The Cisco 880 Survivable Remote Site Telephony model also offers teleworker and small branch voice.

## **Key Features**

Along with easy deployment and centralized management capabilities, these routers offer features such as:

- Built-in security, including content filtering
- Cisco Configuration Professional for simplified management
- WAN connection with multiple access options
- Business Continuity with primary and backup connections on the Cisco 880 router, including 3G and ISDN
- Four 10/100 Mbps Fast Ethernet managed switch ports with optional PoE on two switch ports
- Up to 20 VPN tunnels
- Integrated access point based on the IEEE 802.11n draft 2.0 standard that uses MIMO (Multi-Input, Multiple-output) to improve coverage for existing 802.11 b/g clients and new 802.11n clients
- Cisco Unified Wireless Management Solution
- Business continuity for both data and voice
- Universal software image eases expansion capabilities with software activation
